

Raccortubi and Butting

## Strengthening partnership for distribution in Southeast Asia

**R**accortubi has announced its partnership with Butting for the distribution of longitudinally welded Butting pipes in Southeast Asia. In particular, Raccortubi Singapore has been appointed as sole distributor of Butting pipes in

addition, it will also stock fittings - i.e. elbows, tees, reducers, in the same grades and dimensions, manufactured at the group's production plants Tecninox and Petrol Raccord. By expanding its stock availability to include welded pipes from But-

requirements for welded pipes in the region through a reinforced local presence.

Luca Pentericci, president of Raccortubi, said: "Our presence in various markets supported by our own internal production is further enhan-

the area. Hence, Raccortubi stock in Singapore will initially feature duplex pipes - 10S and 40S wall thickness, sizing from 219.1 to 508, to be exclusively available to customers from the Association of South-east Asian Nations (ASEAN). In

addition, Raccortubi will be able to broaden its offer in the Southeast Asian market for the supply of complete packages of fittings, flanges and pipes, both seamless and welded. Customers in the area will be able to obtain high-quality pipes, produced and accepted in accordance with ASTM A928 class 1, with short delivery times, in line with the two companies' common goal of improving efficiency in fulfilling short-term

requirements in a challenging and demanding market such as Singapore and the other ASEAN countries. We are proud to be associated with Butting, one of the most renowned welded pipe manufacturers in the world and a long-standing supplier of Raccortubi for many years."

Norbert Heinzle, managing director of Butting, explained: "True to our self-conception, we are designing a

powerful network with cooperation partners worldwide. Here our goal is always to be present locally with our products for our customers in the global markets.”

Petrol Raccord, one of the two production units of the group, holds ASME Quality System Certificate (QSC-607) for nuclear applications, allowing for the manufacture and

fittings and flanges in austenitic stainless steel, duplex, super duplex, 6Mo, nickel alloys and titanium from stocks at distribution points in Italy, Brazil, Dubai, Sin-

gapore and the United Kingdom, being constantly replenished by the in-house manufacturing of butt weld fittings at the two production mills Techninox and Petrol Raccord.

Raccortubi Norsk is an experienced stockholder of specialist piping materials for the oil and gas industry. Formerly known as Norsk Alloys, Raccortubi Norsk was acquired by Raccortubi Group in 2015 to extend its distribution network to the United Kingdom. With additional stock material and on-demand manufacturing at its disposal from group headquarters and integrated mills, Raccortubi Norsk is fulfilling customer orders quickly and cost-effectively.

The supply of piping material from such a globally renowned partner coupled with the deep knowledge of the local market of the team at Raccortubi Singapore is the perfect synergy to meet the needs of the South-east Asian customers with efficient, tailored solutions.

supply of material for Class 1 nuclear piping systems according to NCA 3800.

Thanks to the possibilities of both cold and hot forming butt weld fittings, Raccortubi is able to offer customised products according to any specific customer need.

Established by Raccortubi Group in 2013 to act locally and as a hub for the surrounding markets, Raccortubi Singapore represents a firm reference point for the group in South-east Asia. It boasts a large warehouse where it stocks a wide range of piping materials in stainless steel and special alloys for immediate delivery to customers in the region.

Raccortubi Norsk, the group subsidiary based in Aberdeen, Scotland, will be part of the UK’s leading suppliers to the nuclear sector and will show all Raccortubi manufacturing and supply solutions for the industry at the Nuclear Solutions Exhibition in Warrington on April 26, 2018.
